

# QuickGrub

## User Personas

<https://www.figma.com/file/oEPnwXaGTASteEBMQafSs5/Untitled?node-id=0%3A1>

## MVP

- Order food from restaurants directly through the app
- Enter the desired address for food delivery
- Pay for the food directly from the app and allow for tips
- Rate the user experience and food deliverer
- Allow restaurants to advertise their food on the app
- Create an easy interface for restaurants to enlist
- Create direct communication between the app and the restaurant

## User Stories

- As a customer, I want the option to view the restaurants im ordering from
- I want to be able to give the specific address where I want the Food delivered
- I would like to pay for the food and service from the app itself
- I would like to give feedback on driver and delivery performance
- As a restaurant, we want to advertise our product and services
- As a restaurant, there needs to be good, effective communication between the customer and us
- As a restaurant, we want to enlist easily
